## **DIGEST**

**October-February Exports Down In FY 1991** (see p. 2). U.S. agricultural exports fell to \$16.5 billion (55 million tons) during the first 5 months of FY 1991, a decline of \$1.4 billion and 14 million tons. Reduced grain exports accounted for much of the drop. Record world wheat production, record grain production in China, and near-record output in the Soviet Union reduced world trade. With both prices and volume lower for corn and wheat, U.S. grain and feed exports declined \$2 billion.

**U.S. Agricultural Imports Level** (see p. 6). Agricultural imports remained at \$9.4 billion during the first 5 months of FY 1991. Gains among competitive commodities, including cattle, meat, wheat, fruits, tree nuts, sugar, and malt beverages were offset by declines for noncompetitive products, such as coffee, tea, and rubber.

**USDA Announces Allocations for the Export Market Promotion Program (MPP) in FY 1991** (see p. 7). USDA allocated \$200 million to 47 trade organizations to conduct export market promotions for a variety of agricultural products during FY 1991. Almost half the MPP funds allocated are for promotions of horticultural products. Citrus fruits and California wine topped the list of FY 1991 MPP horticultural product allocations.

**Billion-Dollar Markets for U.S. Agricultural Exports** (see p. 10). Japan was the top market for U.S. agricultural exports during the past 3 fiscal years, followed by the Soviet Union, Canada, South Korea, Mexico, the Netherlands, Taiwan, West Germany, and China. Sixty percent of U.S. agricultural exports went to these nine countries. Feed grains and products led in export value, followed by soybeans and products, wheat and products, and live animals and meat.

## October-February Exports Down in FY 1991

U.S. agricultural exports fell to \$16.5 billion (55 million tons) during the first 5 months of FY 1991, a decline of \$1.4 billion and 14 million tons. Reduced grain exports accounted for much of the drop. Record world wheat production, record grain production in China, and near-record output in the Soviet Union reduced world trade. With both prices and volume lower for corn and wheat, U.S. grain and feed exports declined \$2 billion. Exports of high-value products continued rising compared with a year earlier, reaching a record \$9 billion. High-value exports were boosted by continued strong economic growth in major markets and the lower value of the dollar.

The \$1.4-billion decline in total export value was the first drop since FY 1987 (fig. 1). It would be the first decline in export value since the export-oriented policies of the 1985 farm bill began raising export value. In some respects, exports fell as the effects of the price boost triggered by the 1988/89 drought waned. U.S. droughts tend to raise world prices, and this one helped raise export value in both FY 1989 and 1990.

## Commodity Overview

After jumping to \$7 billion in fiscal year 1989 and 1990 (table 4), the October-February value of U.S. grain and feed exports fell to \$5 billion in 1991. This \$2-billion decline during the first 5 months of FY 1991 included drops in wheat, coarse grains, and rice. Rice exports fell \$61 million, wheat dropped \$686 million (38 percent), and coarse grains declined \$1.3 billion (36 percent).

A \$605-million decline was reported for oilseeds and products due to circumstances similar to those facing grains. Many of the conditions in world oilseed markets were the same as for grains, and world trade and prices fell. The volume of U.S. soybean and soybean meal exports shrank as a result.

Cotton exports rose under circumstances nearly opposite those facing grains and oilseeds. Prices were higher, world trade was higher, and the U.S. share of world trade was higher. Cotton value gained \$203 million to reach a record \$1.4 billion, surpassing the FY 1980 October-February value of \$1.3 billion. The reason for U.S. success is the lack of exportable supplies overseas. Since the mid-1980's, the three major competitors of the United States have not kept pace with growing world demand. Pakistan about doubled its cotton consumption in the past 5 years, while its production stagnated. China's production fell just as its consumption was taking off. And the Soviet Union has been largely static.

Increased U.S. horticultural exports at \$2.5 billion were also reported during the first 5 months of FY 1991, a record high and a \$400-million increase from a year earlier. Continued strong demand from Canada, the European Community (EC), and East Asia spurred this growth. However, some of the gain stems from revised U.S. procedures for collecting data. As recently as FY 1990, U.S. agricultural exports to Canada were undercounted, and horticultural exports were particularly affected. But, in 1991, no undercounting occurred as the accuracy of U.S. trade data increased. The undercounting of previous years makes the 1991 increase appear higher.

## Foreign Grain Supplies Rise

Falling prices reduced the value of U.S. agricultural exports compared with a year earlier, both directly, in the case of wheat exports, and indirectly, in the case of coarse grain exports. Recovering U.S. production and higher overseas output have lowered prices since the

1988 drought. During 1989/90 and 1990/91, foreign production of wheat rose an estimated 63 million tons and foreign production of coarse grains by an estimated 14 million tons.

The volume of both U.S. coarse grain and wheat exports fell during the first 5 months of FY 1991, but wheat exports fell only slightly, down 838,000 tons to 10.2 million tons. Coarse grain exports totaled 22 million tons, falling 11 million tons. As a result, much of the 38-percent decline reported in the value of wheat exports was due to price, while lower volume accounted for most of the coarse grain 36-percent decline. These changes are related: more rapid growth in wheat production meant increased global wheat supplies in 1990/91, while coarse grain supplies fell slightly. Therefore, the average per ton value of U.S. coarse grain exports fell just \$4 in FY 1991, while the average unit value of wheat fell \$54 per ton. With world price changes favoring wheat, global use of wheat as livestock feed rose, cutting coarse grain use and U.S. corn exports.

Grain production increased in important importing countries during 1990/91. Record grain production in China and near-record production in the Soviet Union helped weaken U.S. sales during the first 5 months of

FY 1991. U.S. exports to the Soviet Union showed the largest change, declining \$1 billion to \$600 million. U.S. corn exports to the Soviet Union reached record and near-record levels during 1989 and 1990. Poor production boosted U.S. exports in the Soviet Union in 1989 as well as in other exporting countries that year. In 1990, U.S. corn exports remained strong despite increased Soviet production, partly due to a reduced rate of transfer from Soviet producers to consumers. Much of the \$1-billion decline in exports to the Soviet Union in 1991 occurred in coarse grain exports.

Although China had a record grain crop and imported less U.S. grain, increased cotton shipments to China offset some of the loss. So, the value of U.S. agricultural exports to China fell just \$128 million to \$261 million.

However, China's record grain crop limited U.S. exports elsewhere in Asia as China's corn and sorghum exports rose. Korea increased Chinese coarse grain imports and fed more wheat to livestock, cutting into U.S. imports by \$100 million, keeping 1990's record \$1.1 billion intact. (Stephen MacDonald, Commodity and Trade Analysis Branch)

## U.S. Agricultural Imports Level

Total U.S. imports of agricultural products remained the same at \$9.4 billion during the first 5 months of FY 1991 compared with the October 1989 - February 1990 period. Gains among competitive products, including cattle, meat, wheat, fruits, tree nuts, sugar, and malt beverages were offset by declines in noncompetitive products, such as coffee, tea, and rubber.

Cattle imports for the first 5 months rose 22 percent to 1.1 million head, as more feeder cattle and steers entered from Mexico and Canada. Beef import volume edged 4 percent higher to 317,000 tons worth \$777 million, as increased purchases from Australia and New Zealand more than offset lower shipments from other countries. Pork import tonnage moved up 6 percent from its year-earlier level to 132,000 tons, made up primarily of fresh and frozen pork from Canada and Denmark. Wheat imports from Canada surged 85 percent to 320,000 tons, owing partly to lower quality domestic wheat.

Fruit import volume edged 2 percent higher to 767,000 tons, with increases for Canadian apples; Mexican, Bahamian, and Spanish citrus; and Mexican melons.

Counterbalancing these increases was a steep decline in orange juice imported from Brazil, to about half the 1990 level when freezes damaged the U.S. orange crop. Cashew nut imports from India have climbed substantially, accounting for most of the gain in U.S. tree nut imports.

Coffee import volume dropped 12 percent to 519,000 tons, reflecting relatively large stocks accumulated when prices were lower. Indications that Brazil will rejoin the International Coffee Agreement contributed to recent price increases on world markets. Brazil temporarily suspended coffee export registrations in March, possibly affecting some shipments later in the year. Brazil shipped about 34 percent of U.S. coffee imports in the first 5 months of FY 1991 compared with 17 percent during the same period in 1989/90.

While imports of most noncompetitive products were lower compared with year-earlier levels, banana imports remained strong. More than 1.3 million tons arrived in the 5-month span, up 5 percent from the year before. Increases from Ecuador, Costa Rica, Colombia, and Mexico offset steep declines from Honduras, Guatemala, Panama, and Venezuela. (Thomas Warden, 202-219-0822).

## **USDA Announces Allocations for the Export Market Promotion Program (MPP) in FY 1991**

USDA allocated \$200 million to 47 trade organizations to conduct export market promotions for a variety of agricultural products during FY 1991. Almost half the Market Promotion Program (MPP) funds are for promotions of horticultural products. Citrus fruits and California wine topped the list of horticultural product allocations.

On January 16, 1991, USDA's Foreign Agricultural Service (FAS) announced FY 1991 allocations for the Market Promotion Program (MPP). Authorized under the 1990 Food, Agriculture, Conservation, and Trade Act of 1990, the MPP permits the Commodity Credit Corporation (CCC) to provide commodities or funds to eligible trade organizations as partial reimbursement for overseas market promotion activities. The MPP replaces the Targeted Export Assistance (TEA) Program, a market promotion effort under the 1985 Food Security Act. Market development, the main goal of the MPP, is broader than TEA's chief objective, which focused on unfair trade practices of other nations. However, the MPP continues to give priority

to commodities whose exports have been damaged by unfair trade practices of other nations.

MPP promotions may be conducted throughout the world. During 1986-90, the major share of market promotion activities under the TEA was conducted in Japan, other developed Asian countries, and Western Europe. Market promotion activities, defined generally as technical assistance, trade servicing, and generic and branded consumer promotions, can include generic or brand media advertising, point-of-sale promotions, nutrition information pamphlets, recipes, articles in trade publications, trade missions to the United States, and technical assistance in processing U.S. agricultural commodities.

Fresh and processed citrus fruits from Florida, California, and Arizona received the largest MPP allocation, \$19 million for FY 1991. The average annual allocation for citrus fruits under the TEA was \$16.7 million. The next five largest recipients in 1991 were raw cotton (\$18.4 million); soybeans and soybean products (\$16.1 million); California wine (\$15 million); regional and national organizations of State Departments of Agriculture (\$13.8 million); and red meats (\$13.6 million). These six commodity categories constituted 48 percent of total 1991 MPP allocations. (Karen Ackerman, Commodity and Trade Analysis Branch)

## **Billion-Dollar Markets for U.S. Agricultural Exports**

Japan was the top market for U.S. agricultural exports during the past 3 fiscal years, followed by the Soviet Union, Canada, South Korea, Mexico, the Netherlands, Taiwan, West Germany, and China. Sixty percent of U.S. agricultural exports went to these nine countries. Feed grains and products led in export value, followed by soybeans and products, wheat and products, and live animals and meat.

Japan bought 20 percent of total U.S. agricultural exports in FY 1990, the same share as the 1988-90 average, qualifying easily as the leading customer for U.S. farm exports. Japan's 1990 purchases were more than double the value shipped to Canada, the second leading importer of U.S. farm products. U.S. exports to Japan exceeded: \$2 billion for feed grains; \$1 billion for live animals and meat; \$500 million for individual categories of soybeans, fruits, and cotton; and \$250 million for individual categories of hides and skins, wheat, feeds and fodders, vegetables, and tobacco.

Japan's 1990 purchases totaled over \$8.1 billion of U.S. agricultural products, nearly matching its 1989 value. Japan was either the first- or second-ranked market for each major commodity group (exports totaling \$1 billion or more) except wheat. Japan increased its imports of U.S. hides and skins from \$412 million in 1989 to \$474 million in 1990, and U.S. cotton from \$492 million to \$564 million. However, Japan's imports of U.S. live animals and meat declined from \$1.55 billion to less than \$1.49 billion. The value of Japan's imports of U.S. soybeans slipped from \$942 million to \$849 million, in spite of a 12-percent increase in volume.

Canada took 9 percent of U.S. exports in 1990, up from an average 7 percent during 1988-90. Canada advanced from the fifth-ranked market for U.S. agricultural exports in 1989 to second in 1990 by increasing its purchases of U.S. agricultural products by more than \$1.5 billion to \$3.7 billion. The rise largely reflects implementation of a new export-reporting method with Canada, which corrects a longstanding underreporting problem. Canada became the top market for U.S. fruits, vegetables, and poultry exports and the second-ranked market for U.S. live animals and meat.

The Soviet Union purchased 7 percent of U.S. agricultural exports, slipping from second place in 1989 to third place in 1990 as its imports of U.S. grains

declined. The Soviet Union was still the top market for U.S. wheat exports. U.S. feed grains, wheat, and soybeans constituted over 90 percent of U.S. exports to the Soviet Union in 1990 as well as during 1988-90.

South Korea, the fourth-ranked market for U.S. agricultural exports in 1990, remained the top market for U.S. hides and skins and the second largest market for U.S. raw cotton exports. South Korea was also the fourth largest market for U.S. agricultural exports for 1988-90 and in 1989.

Mexico declined from the third largest market for U.S. exports in 1989 to the fifth largest in 1990, largely because of lower imports of U.S. soybeans and live animals and meat. However, Mexico remained the top market for U.S. exports of dairy products and fats, oils, and greases but slipped to the second largest market for U.S. seed exports.

Taiwan, a large market for U.S. feed grains, soybeans, hides and skins, fruits, and cotton, advanced from seventh place to sixth in 1990 but continued to rank seventh for the 3-year period.

The Netherlands declined from sixth place in 1989 to seventh place and ranked sixth overall for the 3-year period, remaining an important market for U.S. oilseeds and feed grains. Many of these exports, however, were forwarded to other destinations. The Netherlands was also the leading initial destination for U.S. peanut exports during 1988-90.

West Germany advanced from 10th place in 1989 to eighth in 1990. West Germany remains the top market for U.S. tree nut exports and the second largest market for unmanufactured tobacco. It is also a major market for U.S. soybean and cotton exports.

China, cutting its imports of U.S. wheat in 1990, fell to the second largest U.S. wheat market. China remained the third largest market for U.S. cotton in 1990 and placed 10th among markets for U.S. agricultural exports.

### **Feed Grains and Soybeans Lead Commodity Exports**

Feed grains, soybeans, and wheat made up 49 percent of U.S. agricultural export value during 1988-90 and 47 percent in 1990. Feed grains and products ranked first overall during the past 3 years with 20 percent of U.S. agricultural export value and first in 1990 with 22 percent of the value. Japan, usually the largest

market, took 25 percent of U.S. feed grain exports during 1988-90. The Soviet Union was the second largest market in 1990 and during 1988-90. Algeria returned to the top 10 U.S. feed grain markets, rising from 14th place.

Soybeans and products averaged 16 percent of total U.S. agricultural export value during 1988-90 and ranked second among U.S. commodity exports. Japan and the Netherlands (the largest customers) took 16 and 12 percent, respectively, of U.S. soybean exports in 1990. Taiwan was the third largest market in 1990. The Soviet Union became the fourth largest soybean purchaser in 1990, falling from third in 1989.

Wheat and products ranked third among all U.S. agricultural commodity exports during 1988-90 and, in 1990, furnished 11 percent of total export value. China and the Soviet Union were the top markets for U.S. wheat, taking 15 and 14 percent, respectively, during 1988-90. In 1990, however, the Soviet Union surpassed China.

Live animals and meat (excluding poultry) ranked fourth among commodity exports for 1988-90 and in 1990. Japan took over half the U.S. exports. Canada and Mexico led the other customers with 13 and 10 percent in 1990.

Cotton ranked fifth among commodity exports for 1988-90. Japan and South Korea remained the leading markets, together taking 37 percent of U.S. cotton exports and increasing their purchases 13 percent from 1989.

Fruits and preparations ranked sixth among U.S. commodity exports for 1988-90 and in 1990. Canada

took 33 percent of these U.S. exports in 1990, followed by Japan, Hong Kong, Taiwan, and the United Kingdom.

Hides and skins ranked seventh for 1988-90 and eighth in 1990. South Korea bought over 40 percent of these U.S. exports in 1990, followed by Japan, Canada, Taiwan, and Mexico. Algeria advanced from the 19th largest market in 1989 to 10th.

Exports of vegetables and preparations averaged more than \$1 billion per year during 1988-90 and exceeded \$2 billion in 1990. Canada remained the leading customer in 1990, purchasing 35 percent. Japan consistently ranked second in this market. Mexico rose from fourth in 1989 to third in 1990.

Unmanufactured tobacco exports ranked ninth in 1988-90 and 1990. Japan was the major market, followed by West Germany. Hong Kong advanced from the seventh largest U.S. market in 1989 to fourth in 1990.

Among commodity exports that changed significantly from 1989, vegetables gained 35 percent, fruits and preparations rose 22 percent, and poultry advanced 22 percent. Export increases among these commodities largely reflected the new reporting method with Canada. The rise in poultry exports was also aided by an \$81-million increase in sales to the Soviet Union. U.S. cotton exports rose 32 percent as reduced stocks and strong consumption abroad combined with competitive U.S. prices to allow the United States to increase its share of the world cotton export market. Exports of U.S. dairy products fell 27 percent, led by a 68-percent cut in exports to Mexico. (Cecil W. Davison, Crops Branch)
